ABOUT ME

I'm a Computer Engineer currently studying a MSc in Games. I prefer working with a team, and I'm proud of my adaptability. As a gaming enthusiast I plan on becoming a game developer.

WORK EXPERIENCE

20/02/2020 – 31/07/2023 Lisbon, Portugal
FULL STACK DEVELOPER CGI

In this first working experience in the IT industry, I learned how to be a Fullstack Developer, my role in the team, and how to improve through teamwork, shared experiences, and clear communication. During this time I developed in several projects, with international teams, in both front-end (Angular) and back-end (Java and .Net).

PROJECTS

12/09/2018 – 18/07/2019
GOCards - Final BSc Project In this project the application GOCards was developed with the objective of complementing visits to theme parks and other public spaces. We included several functionalities to help make visits more enriching. So the application is based on a map of the space, serving as a guide and suggesting points of interest for the user to go to, while also making it easier for the user to find them. It also has a card collection, that allows the user to collect cards along his visits, showing interesting facts about the places that were visited.

HOBBIES AND INTERESTS

Reading and Writing I enjoy fantasy books and because of that I also have some manuscripts and short stories written. More recently I made a few D&D (Dungeons and Dragons) campaigns for my family and friends to play.

Gaming I've always found fantasy more interesting than any other genre. Reading fantasy books has been a huge inspiration for me. Drawing me into RPGs and more story driven games. I hope to one day be able to deliver not just "another game" but a truly genuine experience. To one day have the creativity and knowledge to tell incredible stories!
